**INTERNATIONAL PRELIMINARY  
REPORT ON PATENTABILITY  
(SEPARATE SHEET)**

IAP20 Rec'd PCT/PTO 19 DEC 2005

**Re Item I**

**Basis of the opinion**

With letter of 25.11.2004 the Applicant has filed a new claim 4. The other claims have been renumbered accordingly. The basis for this claim can be found on page 7 of the description.

These amendments are in line with 70.2(c) PCT, since they do not extent beyond the content of the application as originally filed.

**Re Item III**

**Non-establishment of opinion with regard to novelty, inventive step and industrial applicability**

Claim 11 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion with regard to the industrial applicability will be formulated for this claim (Article 34(4)(a)(i) PCT).

**Re Item V**

**Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The following document has been cited in the International Search Report:

D1: WO 03/043981 A (GLAXO (GB)) 30 May 2003 (2003-05-30)

**Novelty (Article 33(2) PCT)**

The present compounds differ from the compounds in D1 in the groups X and R2.

**Inventive Step (Article 33(3) PCT)**

D1 discloses factor Xa inhibitors and can be regarded as the closest prior art.

**INTERNATIONAL PRELIMINARY  
REPORT ON PATENTABILITY  
(SEPARATE SHEET)**

International application No.

PCT/EP2004/006592

The problem of the invention was the provision of new factor Xa inhibitors.

D1 does not suggest the substitution of the pyrrolidones disclosed therein with a phenyl or a heterocyclic group in position 1.

The present invention is therefore based on an inventive step.

**Re Item VI**

**Certain documents cited**

The following P-document has been cited in the International Search Report:

D2: WO 03/053925 A (GLAXO (GB)) 3 July 2003 (2003-07-03)

The priority documents pertaining to the present application were not available at the time of establishing this report. Hence, it is based on the assumption that all claims enjoy priority rights from the filing date of the priority document. If it later turns out that this is not correct, the P-document D2 cited in the international search report could become relevant to assess whether the present claims satisfy the criteria set forth in Article 33(1) PCT.

It is noted that there is no generic overlap with D2 due to the proviso for R2 (exclusion C2-3alkyl-morpholino) and the definition of Rf in R2=C1-3alkylRf (Rf can not be morpholino).
